No one is turned away for the
lack of funds

Every parent and every child has
experienced deep feelings of

frustration and anger. You are not
alone! *Raising children is a really
hard job!*

In this ten session class, we'll
introduce a philosophy and prac-
tice of parenting based on the
latest research about brain and
child development.

Through discussion groups, theo-
ry, role playing, and specific
problem solving, we will:

* Learn to set clear and respectful
boundaries

* Explore ourselves and our chil-
dren through a lens of empathy
and understanding.

* Identify strategies and tools that
will help you successfully create
the parenting relationship you
want with your child.
